EARLIER EXPERIENCE

UX & Product Design
2012-2018

SUMMARY

Principal-level product and experience strategist with 12+ years of experience turning fragmented workflows and complex data into scalable products across retail operations, connected equipment, enterprise software, and regulated clinical research. Known for aligning cross-functional teams and delivering measurable outcomes through human-centered design.

EXPERIENCE

Lead UX Researcher & Designer

Jun 2025 – Present

Moral | Regulated Pharmaceutical Platforms

Lead UX research and product strategy for regulated platforms supporting clinical-trial operations.

- Translate research with Fortune 100 and Fortune 500 pharmaceutical organizations into product direction.
- Align product, engineering, clinical, research, and operations teams through workshops and prioritization.

Principal UX Designer

Mar 2025

KAMP Technologies | Connected Products & Operational Analytics

Lead product design for a connected platform integrating machine telemetry, fleet monitoring, and operational analytics.

- Define interaction models, dashboards, reporting workflows, and foundational patterns that turn machine data into actionable insights.
- Partner with product and engineering leaders to align customer needs, technical constraints, product direction, and UX strategy.

Senior Product Designer – Horizontal Platforms

Jun 2022 – Mar 2025

Kroger Technology & Digital | Enterprise Operations

Product design lead for operational systems spanning supply chain, warehousing, and store fulfillment.

- Led Pick Up Fulfillment workflow design across 2,500 stores, generating ~\$6M in labor savings and improving pick speed 15%.
- Delivered a replacement for a 25-year-old claims platform across 60+ facilities, saving ~1 labor hour per claim across ~160,000 annual claims.
- Aligned workflows and UX patterns across nine product teams.

Senior UX Designer

May 2021 – May 2022

YourCause (Blackbaud) | Enterprise CSR Technology

Led UX design and research for corporate social responsibility software used by 600 enterprise organizations.

- Reduced site setup and page-management time by ~20% through redesigned workflows and reusable patterns.

Senior Interaction Designer

Oct 2018 – May 2021

Software Engineering Professionals (SEP) | Consulting

Consulted on product discovery, UX strategy, research, and interaction design across enterprise and consumer products.

- Led discovery and design for machine-diagnostics tools supporting 2,000+ service shops.
